# SLAPP 24 Manual

## Host mode

Use host mode to display the admin in one browser window and use a second browser to display to the audience. For example when using the beamer as a secondary display. In host mode the poets list is hidden for the audience. When viewd by the host the audience is shown the logo screen.

## Single mode

In single mode the UI can be toggled with Ctrl+H. Everything else works as expected. This can be used if the display is mirrored with the beamer or audience display.

## Settings

**ROUNDS**

Number of rounds before finale

**BOARDS**

Number of score boards in the audience

**FINALISTS**

Number of poets who make it into the finale. Overriden by „Lucky Loser" when finale is generated.

**DECIMALS**

Switch on to use decimals for scoring

**LUCKY LOSER**

Switch on when having more than one group to also highlight the next poet with the highest score of the whole competition who did not win a r ound.

## Demo poets

Press Z to create a two round Slam or U to create a one round Slam with 6 poets.

## Shortcuts

All shortcuts need to be pressed with the Ctrl-Key modifier.

**H** Toggle host mode

**N** Next screen (Logo, Name, Input, Score)

**M** Toggle single mode

**L** Show list of poets and settings

**G** When running more than one round press this and then the number of the round (also with Ctrl) to jump to that round. Used in the ranking view.

**1...0** Switch to poet with that index

**P** Show name of current poet

**J** Enter scores for current poet

When using decimals do not enter the decimal point. Just enter the first digit follow by the second. To enter a straight 10 just press 0. No Ctrl need in this view.

To clear all scores for the poet press C

To start over without clearing press X

**S** Show score of current poet

**R** Show ranking for current round

**F** Show ranking over all rounds

**T** Show finalists

**Q** Create finale from finalists

**W** Show winner

**Y** Show logo

**Y** Show sponsor video (loop.mp4)

**I** Show rules video (rules.mp4)
